

SENIOR QA SPECIALIST

Do you want to help build an innovative company that develops a disruptive technology? You don't save your efforts to achieve the expected results? You are autonomous, focused on results and you want to be in charge an exciting project? We are currently seeking a **SENIOR QA SPECIALIST** to help support the growth of our QA division.

B-TEMIA Inc. is an emerging technology company that develops and commercializes cutting edge devices to improve mobility and human performance (Human Augmentation Systems), with applications in medical and commercial fields. B-Temia owns a patented technology called Dermoskeleton^{MC}, that provides users with a motorized mechanical support to restore, maintain or increase their mobility abilities. B-TEMIA aims at becoming a leader in the fast-growing market of human augmentation by building of a world-class team and leveraging best practises and bold innovations.

YOUR MANDATE

Based in our offices located at 4780 St-Félix Street, Suite 105 at St-Augustin-De-Desmaures, you will work in close collaboration with the Vice-President Regulatory Affairs, Clinical Affairs, and Quality Assurance for all issues relating to quality assurance and set up the necessary tools.

More precisely, you will take charge of the following operations:

- Apply and comply with the quality assurance standards
- Support the certification of the products or the quality system
- Perform and supervise the inspection and the final checks of deliverables to ensure quality
- Document quality assurance activities, such as internal audits
- Analyze and document customers' complaints and other problems related to non-compliance
- Collect and categorize statistical data related to quality (e.g.: supplier performance, after market monitoring, etc.)
- Develop, recommend, and monitor remediation and improvement measures
- Ensure documentation and record control of the existing quality management system
- Manage the equipment control
- Maintain the process control plans
- Any other activity relating to the maintenance and the performance of the quality system

SPECIFIC REQUIREMENTS:

- College diploma or university degree in a relevant field
- Solid and relevant experience, knowledge of regulatory requirements
- Know how to implement remediation programs
- Experience in the medical device industry or with a quality management system
- Excellent knowledge of Microsoft Office Suite
- Knowledge of the terminology, tools, and methods specific to quality assurance

- A certification, such as quality auditor, Six Sigma or quality improvement certification, is an asset.
- Excellent communication skills in English (both spoken and written)

GENERAL REQUIREMENTS:

- Analytical abilities
- Rigour
- Ability to solve problems and make decisions
- Ability to work in a team, under pressure and in a dynamic and fast environment

If you are interested in this position, please send your application to career@b-temia.com.

Note: Only candidates selected for an interview will be contacted.
